

Every lid pair is immaculately uniform. When you care, every detail matters.

FEL DUMPSTER
Features

PLAST-AX FEL LIDS

Big Win.

Inherent flex and impact resistance to last.

Moulded evenly with strong corners, thick edges, and consistent strength.

Every lid pair sits square, flush, and tight together.

It's dumpsters and lids together, that's the key.

The fibreglass hinge-rod provides additional tolerance for the dumpster and lids to all move together.

(Conversely, with steel dumpster hinge rod, it's the steel hinge rod that bends – and stays bent. Then the lid busts - and you have to fix it)

Lid pairs can be supplied in any colour to suit your company branding or to assist in directing waste streams: e.g. Light Grey for cardboard, Yellow for comingled recycling.

1/8 inch stainless split pin
